Profile

Backend & AI engineer who ships production software that moves real revenue. Sole architect of TedOS, a multi-tenant AI marketing SaaS now powering millions in revenue for its founder, and builder of MOON, an SEO-led D2C storefront that scaled a Kashmiri brand to 1,200+ orders and 8,000+ customers. I turn a non-technical founder's "I wish my business just ran itself" into working systems — FastAPI / Node backends, OAuth integrations, LLM agent pipelines, CRM automation and revenue-ready frontends — owning architecture end to end.

Experience

Lead Full Stack Engineer, TedOS - Ted McGrath Brands	2024 – Present
- Sole developer on a multi-tenant AI SaaS — architected the full backend from data model to deployment; the platform now powers millions in revenue for its founder. - Built agency-level OAuth 2.0 integration with GoHighLevel (sub-account provisioning, permission scoping, token refresh), replacing 8–12 hours of manual onboarding per client account. - Designed a microservice pipeline ingesting 20 structured intake fields and triggering 17+ AI asset-generation jobs via the Claude API with structured JSON output parsing. - Multi-org PostgreSQL row-level security, Clerk sessions and PLpgSQL migrations; n8n / Pabbly fallback flows with retry logic and structured logging — 690+ commits on Vercel with Vitest coverage across critical paths.	US, Remote
Backend & Automation Developer, Scalez Media	2024 – 04/2026
- Integrated Claude + OpenAI into content pipelines; built prompt templates and output parsers producing structured JSON for downstream services. - Built lead ingestion, deduplication, and enrichment modules that cut pipeline errors significantly, plus server-side automation connecting CRMs, email providers, and ad networks.	Mumbai, IN
Full-Stack & SEO Engineer, MOON Naturally Yours	2025 – Present
- Designed and shipped a premium, mobile-first storefront for a Kashmiri wellness brand solo — scaling the founder's business into lakhs in revenue. - Delivered measurable traction: 1,200+ orders, 8,000+ customers across India, 4.9★ average rating. - Built the full SEO foundation — schema / OpenGraph / canonical metadata and semantic structure — driving organic discovery, plus catalogue, cart, and WhatsApp-based checkout.	Kashmir, IN
Full-Stack Developer, Freelance	2022 – 2024
- Designed and shipped production web apps in Next.js / TypeScript / Tailwind for founders and small teams, owning architecture through deployment. - Built reusable, fully responsive component systems with a clean separation of data and UI layers for long-term maintainability.	Remote

- Integrated external REST APIs (payments, CRM, content, third-party services) with resilient async data-fetching — proper loading, error and retry handling.
- Applied SSR and server-side caching on performance-critical routes to reduce load times and improve real-world page speed.

Education

B.Tech Computer Science, *University of Kashmir*
Concurrent with full-time product work

2024 – 2028
Kashmir, IN

Technical Skills

AI & LLMs Anthropic Claude API, OpenAI API, AI agent workflows, RAG pipelines, structured output parsing, LLM orchestration, prompt systems	Backend & API FastAPI, Node.js, Express, REST API design, OAuth 2.0, webhooks, microservices, async queues, Prisma ORM
Automation / CRM GoHighLevel API, n8n, Make.com, Pabbly, Zapier, webhook event pipelines	Languages / Data Python, TypeScript, JavaScript, Go, SQL, PLpgSQL, PHP, Bash, PostgreSQL, Supabase, MySQL, Redis, SQLite
Frontend / Infra React, Next.js, React Native + Expo, Tailwind, AWS, Vercel, Docker, Git / GitHub Actions, Vitest, Jest	

Selected Projects

- Amazon Review Intelligence**
FastAPI · Next.js 14 · Sigma.js · VADER/TextBlob NLP · Apify. AI review-analytics SaaS: interactive network-graph dashboard, sentiment & theme extraction across 10+ marketplaces, bot detection, multi-format export. Dockerized, CI/CD.
- Agricultural Advisory App**
Node.js · Express · Prisma · PostgreSQL · React Native + Expo · SQLite. Offline-first crop disease detection & advisory for smallholder farmers — sync queue, planting guides, market prices, multilingual (EN / Urdu / Punjabi).
- Stellar Spaces**
React 19 · Framer Motion · Tailwind v4 · Vite. Design-forward, animation-rich multi-page SPA with motion-driven interactions and fully responsive layout. Deployed on Netlify.
- Crypto Tracker**
React · CoinGecko API · Recharts. Real-time market dashboard: live prices, 7-day charts, multi-currency (USD/EUR/GBP/INR), search, watchlist, dark mode.
